

**SUMMARY**

The Stellar V is an IP20 batten ideal for commercial and industrial applications. It features Five-Colour selectable and Multi-Watt selectable technologies, giving installers the choice of 5 colour temperatures and 8 wattages in 1 fitting so that fewer varieties are required to meet a broader range of needs. With the installer in mind, the Stellar V has been engineered with a clever toolless end cap and quick-to-fit single piece LED light module. It also incorporates multiple cable entry points and a large 6mm terminal block. The integrated sensor's dimming function can be conveniently controlled from a distance with the compatible remote control - available to order separately.
