

CONNECT TO YOUR HOME WIFI AND PAIR WITH YOUR DIY SMART SWIFT WIFI CAMERA – 20801/05.

BEFORE YOU BEGIN PLEASE DOWNLOAD AND REGISTER THE BRILLIANTSMART APP.

For help or assistance go to www.brilliantsmart.com.au

Monitor your home from anywhere, anytime. The smart Swift camera allows you to move the lens up and down and swivel to see all areas of the room.

Enable your WiFi network on you mobile device making sure to select 2.4GHz frequency network if your home network supports dual band frequencies. i.e. 2.4GHz or 5GHz.

It's important that you connect to 2.4GHz Frequency. Please disable or unselect the 5GHz Frequency in home WiFi network if able. This can be reselected or enabled once the smart devices have been paired to the BrilliantSmart app.

Note: if you are not familiar with this procedure you may need to contact your internet service provider for some assistance.

Before installation of your BrilliantSmart device (in the location you desire) please check the WiFi signal is at least 2 bars strength on your mobile device WiFi icon.

If a poor WiFi signal, upgrading your router, installing an AP(Access Point) or adding a WiFi Extender may be needed (sold separately). If installing more than 15 smart devices to your WiFi Network, we do not recommend using WiFi extenders – these will be recognised from your Network as a separate Smart device and will limit your connectivity.

INSTALLATION

Unpack camera from box and check all components are included – smart camera, power adaptor and micro USB cable, mounting bracket, rawl plugs, screws (microSD memory card not included). Please dispose of this packaging material thoughtfully. Also, please dispose of this product thoughtfully once it has passed its useful life. When your smart device comes to the end of its life or you choose to update or upgrade it, please do not dispose of it with your normal household waste. Please recycle where facilities exist. When disposing of this fitting, check with your local authority for suitable options.

BRACKET MOUNTED

STEP 1

Using mounting bracket as template. Drill 2 x holes in mounting surface with correct size drill bit.

Insert 2 x Rawl plugs (supplied) and fasten mounting bracket with 2 x screws (supplied) into Rawl plugs.

STEP 2

Secure camera to locking lug.

STEP 3

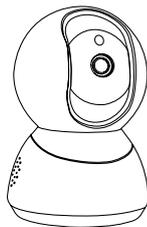

Connect USB cable into device and adaptor. Plug adaptor into power outlet. Continue with WiFi setup.

SURFACE MOUNTED

STEP 1

Place device on any safe and stable surface. It will need to be close to a power socket for power.

STEP 2

Connect USB cable into device and adaptor. Plug adaptor into power outlet. Continue with WiFi setup.

INSTALLATION OF MICRO SD CARD

Ensure the camera is turned off. Gently roll the lens head up to reveal the memory card slot, then slide the 128GB (or smaller) Micro SD memory card into the slot. The camera lens will adjust itself automatically once it's turned on and paired.

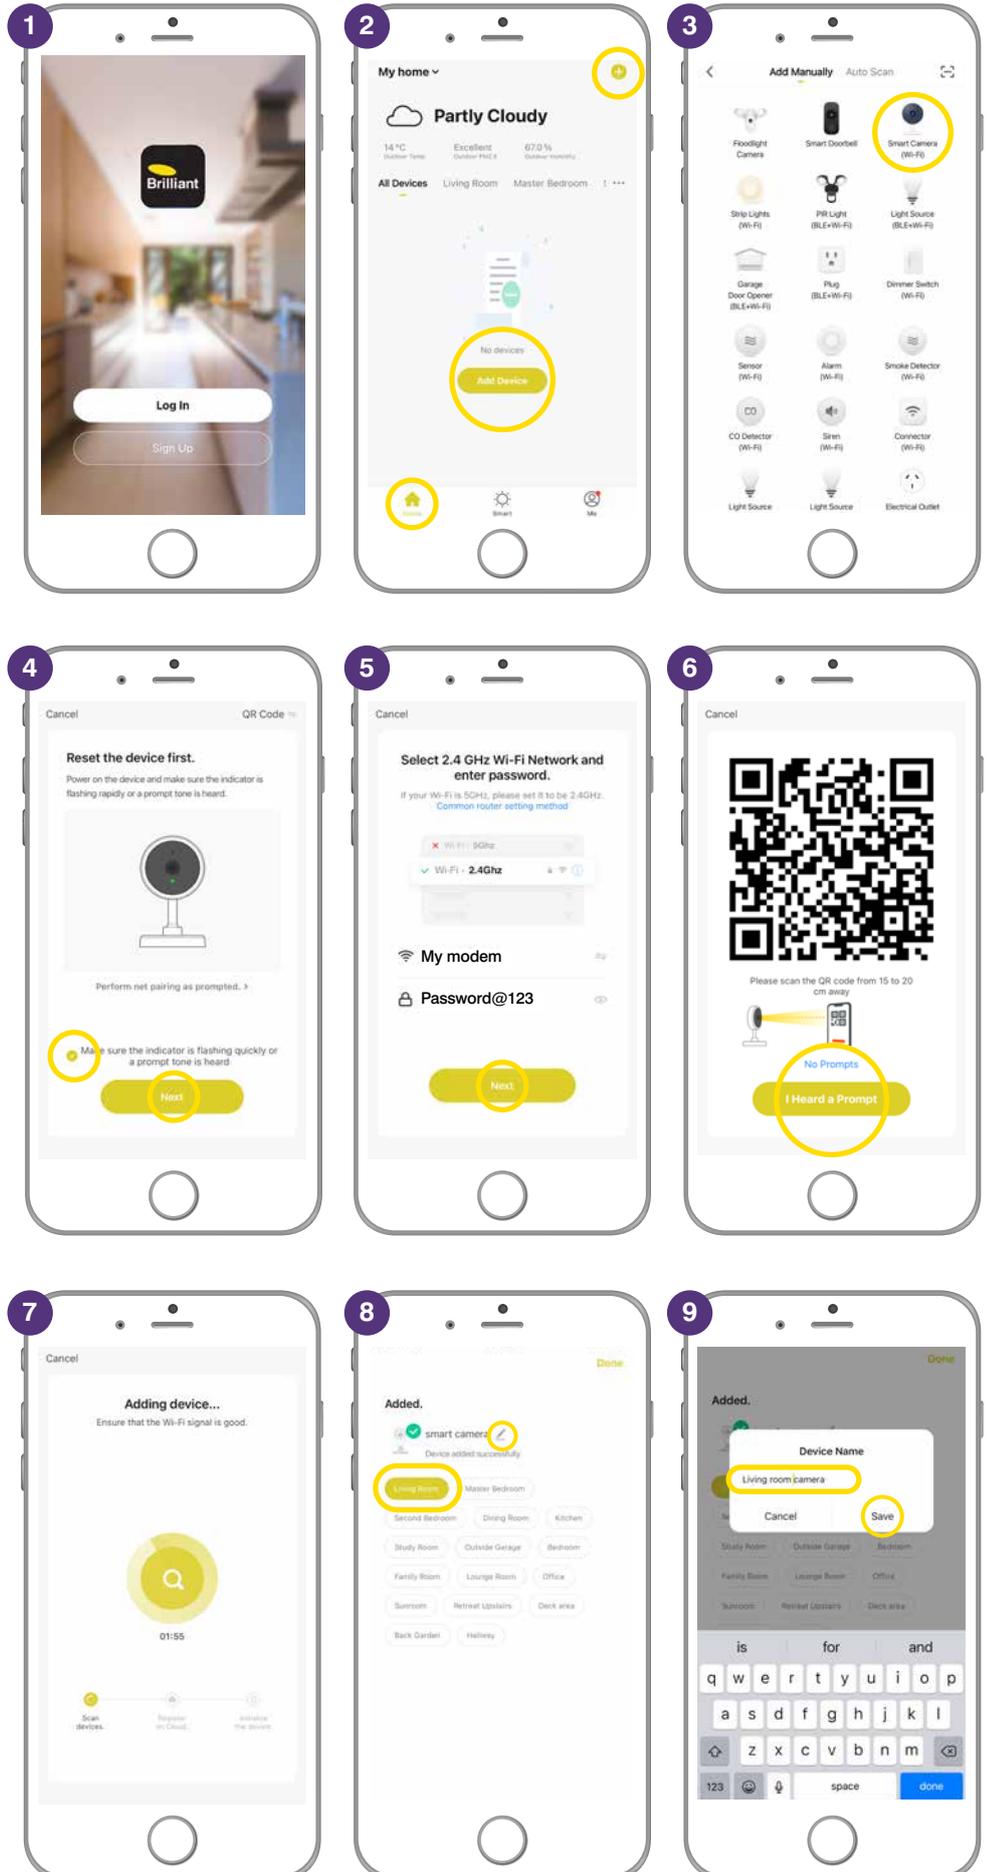

TECHNICAL SPECIFICATIONS

MODEL NO: 20801/05			
Dimensions	130 x 80mm	Cable length	2m
Lens	HD 720P 2.0 Megapixel camera	Day vision	Up to 12m distance max
		Night vision	Up to 5m distance max
Direction	Pan 355° Tilt 45°	Night vision lens	10 x IR LEDs
Memory/storage	Micro SD card up to 128GB max – Class 10 minimum (not included)	Adaptor	220V–240V AC 50Hz Output: 5V DC, 1A–2A (not included)
Sound Detection	Sends notification to phone	Motion Detection	3-Level motion detection (low, medium, high) – sends notification to phone
Audio	High quality two-way audio	Weather resistant rating	IP20 – indoor use only (do not use in wet areas)
Works with 2.4GHz WiFi frequency only		Security: Mac Encryption; WEP/WAPI/TKIP/AES	
WiFi Standard: 2.4GHz IEEE802.11b/g/n		System Req's: iOS 8.0 or higher, Android 4.1 or higher	
Included in the box: Smart Swift Camera, AC Adaptor, Micro USB Adaptor Cable, Wall Mounting Bracket, 2 Rawl Plugs, 2 Screws, Installation Manual x 1			

BRILLIANTSMART APP – SWIFT WiFi camera – START UP

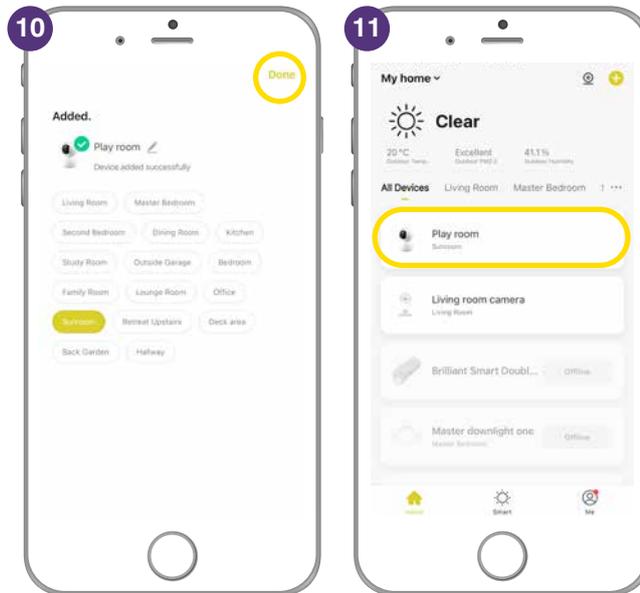

On power-on, after approx 5 seconds, the Swift camera red lights will appear and camera will rotate and chime 3 times twice, then it will begin beeping. It is ready to pair with the BrilliantSmart App.

1. Open the BrilliantSmart App that you've previously registered and setup.
2. Press the home screen. If you are connecting a smart device for the first time – press 'Add Device' or if you are adding another smart device – press the plus sign '+'.
Icons may differ depending on your phone, tablet or operating system.
3. Next select the type of device you wish to add. If you're connecting a Smart camera device, tap 'Smart Camera'.
Icons may differ depending on your phone, tablet or operating system.
4. If you have heard a prompt tone (3 quick chimes) then tap on the 'tick' for 'make sure the indicator is flashing quickly or a prompt tone is heard'. Then press 'Next'.
5. Select your 2.4GHz network on your home modem and enter your password. *Note: for first time users you may need to search for your 2.4GHz network and add your password.* Once your device is paired, the BrilliantSmart app will save this information so you don't need to re-enter each time a device is added. **This is private and confidential with no access from third parties.**
6. Scan the QR code with the smart camera. Ensure the QR code is facing the smart camera lens approx 20cm apart – hold until the smart camera chimes. Select 'I Heard a Prompt'.
7. The BrilliantSmart app will start connection to your smart device. The red light will stop flashing once connection is in progress.
8. Once connected you'll get a 'tick' and voice prompt 'camera online' to show your device has successfully connected. Select the room your device is to be located. Select the pen icon to change the name of your smart device.
9. Type in the new device name and press 'Save'.

BRILLIANTSMART APP – SWIFT WiFi camera – START UP (continued)

- The smart device can now be controlled by the BrilliantSmart app.
- Select your **Smart camera** to select or change settings.

RESET DEVICE

RESET DEVICE – If the device fails to go into pairing mode after the initial start up.

Press and hold the reset button for approx 5 seconds on the back of the smart device. Device will chime 3 times twice and prompt and start beeping. It is now ready to connect to the BrilliantSmart App. Go to step 1 of Start up settings on page 3.

If connected to the App and you reset the smart device with the pin, devices goes offline – follow start up settings on page 3.

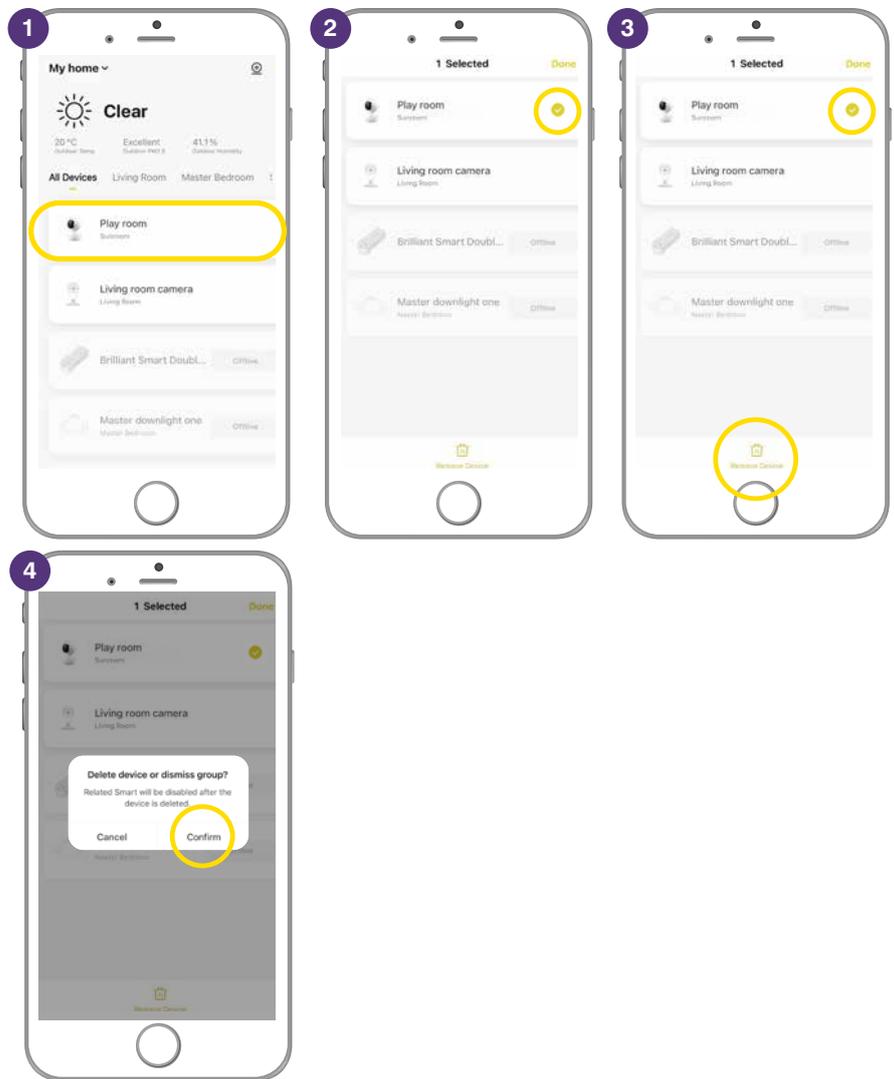

FULL FACTORY RESET

If the smart device is non responsive in the app, the device may need to be reset to factory settings.

- Open BrilliantSmart App. Select the smart device that you want to do a full factory reset and hold/press on device icon.
- Shows **1 Selected** and a **tick** against the selected device.
- Select '**Remove Device**'.
- Press '**Confirm**'.

Camera beeps then chimes 3 times twice.

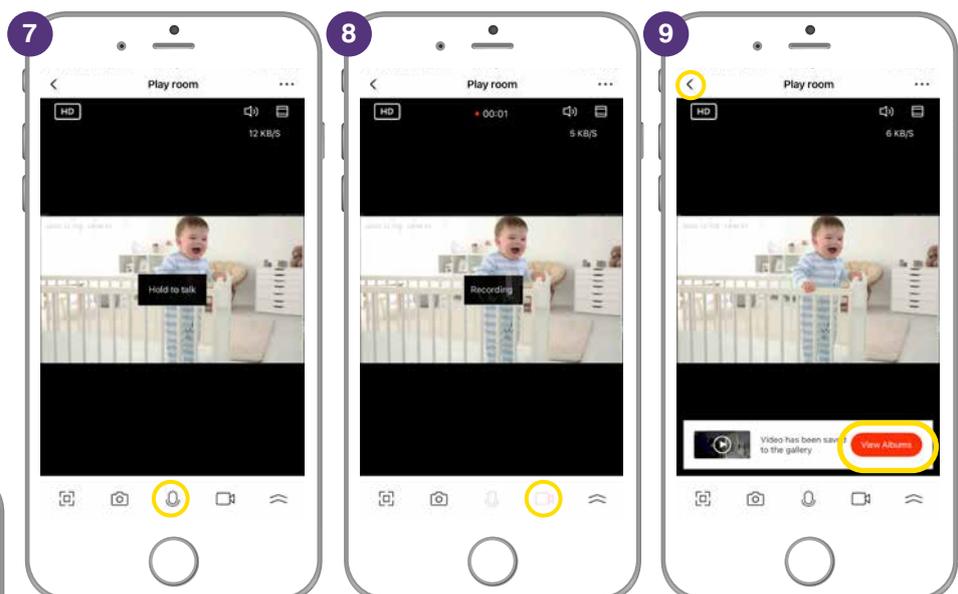

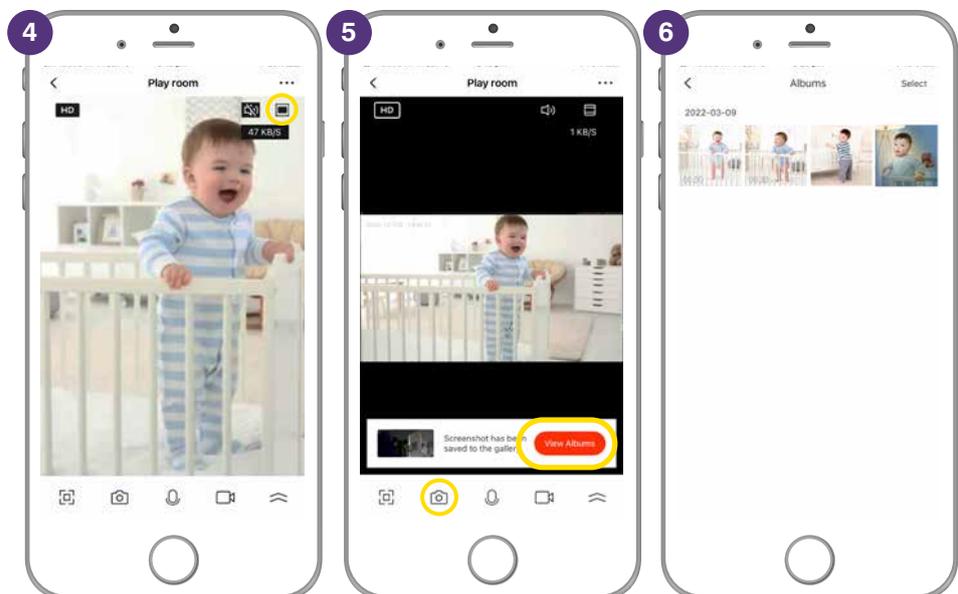

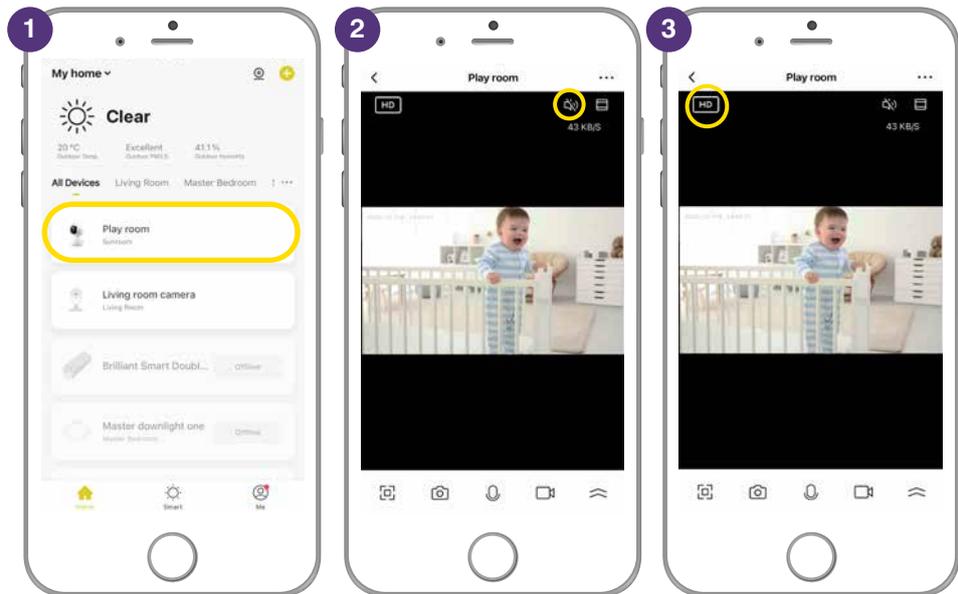

Device is now deleted from the BrilliantSmart app and Cloud. Follow WiFi START UP on page 3 to reconnect device to BrilliantSmart app.

BRILLIANTSMART APP – SETTINGS
