

KIRA-11-ADJ LED Wall Light

Description

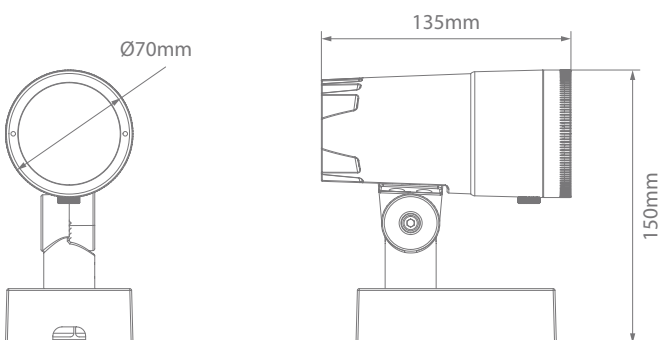

KIRA 11W LED Wall Light Series has been specifically designed to finally provide the perfect spread of light required with an adjustable lens function. Simply rotate the lens cover to spread the beam angle from a narrow 15° beam to a wide 60° beam angle. This feature finally offers the flexibility to spot or flood areas like never before. Ideal for controlling light spread on internal or external columns, or wall washing effect, or even controlling specific areas to highlight. Featuring a high output 11W LED chip, and a tilt adjustable head in a Black, Dark Grey or White powder coated frame. Backed by our 3 Year Replacement Warranty for peace of mind.
