Alternative**

DESTINY PLUS
CYANOSIS EDGE-LIT PANELS

MADE FOR MEDICAL

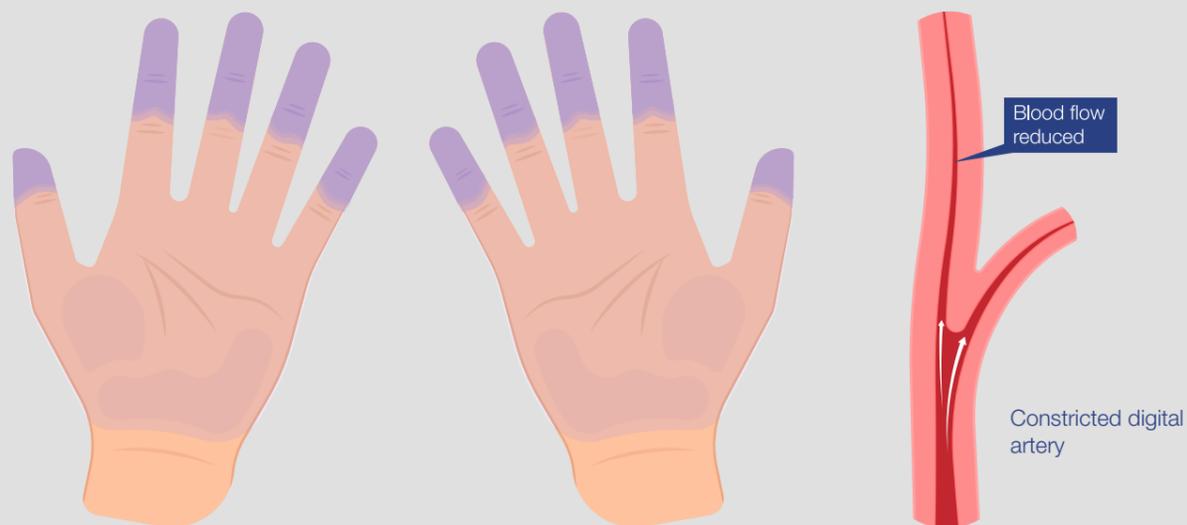

Our Destiny Plus cyanosis-approved panels offer the ideal lighting solution for hospitals, medical centres and clinical observation areas.

Specially designed to help doctors identify and diagnose life-threatening medical emergencies like peripheral cyanosis; the bluish purple discolouration to hands and feet usually caused by deficient oxygenation of the blood.

Engineered with a PMMA light guide for a lighter, brighter and stronger result, these low-glare, edge-lit LED panels deliver superb luminosity. With the inclusion of Flicker-Free technology and an opal polycarbonate diffuser, they also provide superior lighting comfort.

With the installer in mind, these tried and true panels are easy to handle and quick to install. They're incredibly slim at only 13mm thin, and constructed from high-quality aluminium with a smooth powder-coated finish for durability.

PERIPHERAL CYANOSIS

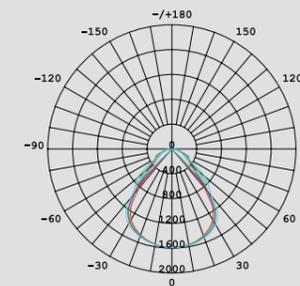

Caused by low oxygen levels in the red blood cells, usually symptoms appear on the hands or feet.

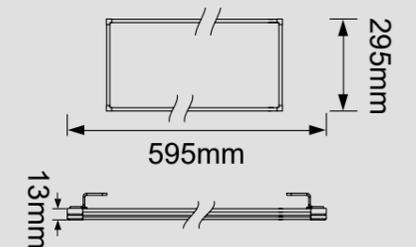

DESTINY PLUS CYANOSIS EDGE-LIT PANEL

6x3

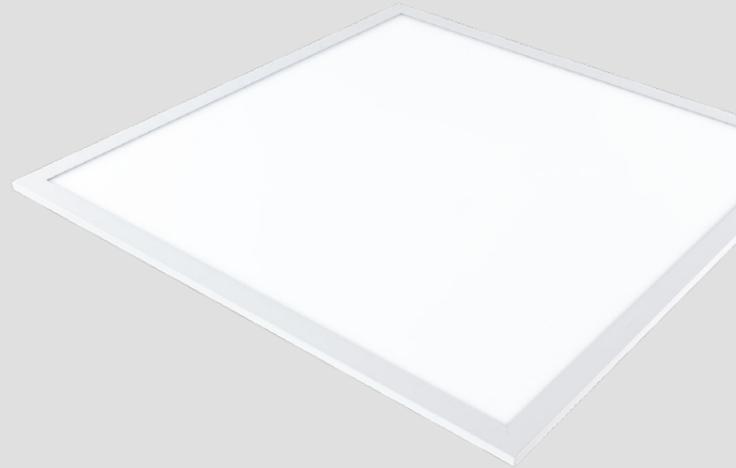

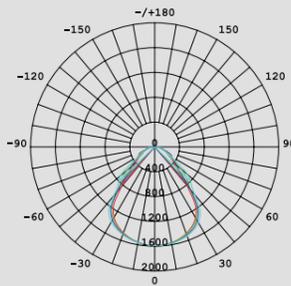

- CRI 90
- PMMA LIGHT GUIDE
- REMOTE DRIVER
- FLEX & PLUG
- UGR<19
- FLICKER FREE
- OPAL PC DIFFUSER
- EASY INSTALL

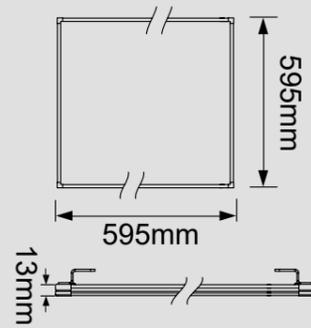

Order Code	Wattage	CCT	Lumen Output
223634	18W	4000K	1,250Lm
